👤 PROFILE

Motivated **freelance web developer** focused on creating responsive, user-friendly websites. I help businesses and individuals build high-performance, modern websites using Django, WordPress, and front-end technologies. Skilled in writing clean code and delivering projects on time with a strong sense of design and user experience.

📁 PROJECTS

Hotel Management System

Built a full-stack hotel reservation platform with Django. Key features include user authentication, dynamic room availability tracking, session-based booking cart, PDF invoice generation, and admin dashboards for managing staff and reservations.

Technologies Used:

- **Backend:** Django, Python, Django ORM
- **Frontend:** Bootstrap, HTML, CSS, JavaScript
- **Database:** SQLite
- **Features:** Session Management, PDF Generation, User Authentication

Atlas Golden Car 🚗

Created a full-featured car rental booking platform using WordPress, WooCommerce, and Turbo template. Implemented online reservation system allowing customers to search, book, and manage vehicle rentals through an intuitive e-commerce interface.

Technologies Used:

- **CMS:** WordPress
- **E-commerce:** WooCommerce, WooCommerce Services Plugin
- **Template:** Turbo
- **Languages:** PHP, HTML, CSS, JavaScript
- **Database:** MySQL

Medical Appointment System

Built and deployed a responsive medical website platform featuring custom Bootstrap template integration with Django backend. Developed dynamic content rendering system, database management, and user interface components for enhanced medical services delivery.

Technologies Used:

- **Backend:** Django, Python
- **Frontend:** Bootstrap, HTML5, CSS3, JavaScript
- **Database:** SQLite, Django ORM
- **Framework:** Django MVT Architecture
